Someone posted that they converted their territory to Mexico and got it for \$19.00. So if you are ready to change your area for a month, you can save yourself \$26 bucks worthy. If you can add more characters which would be great! Thank you! Coolness. I sometimes get my signal to break other games, so it's a relief to see this one being stable. I'm playing first through Langriser 1, so most updates will focus on that. I suspect gear is only between both parts of the game, but is not confirmed. I just filled all the offsets around my item address and now I have all the items. i Maybe we can create an array of byte codes to fill them, I'll try to do it tomorrow except dummy items. Go right for it. Honestly, I'm pretty terrible at hacking and can't do much beyond entry-level stuff. EDIT: Slightly updated table, adding soft. There you go! I added a code that gives 9 of all weapons, armor and accessories, please test it and let me know if it works for you... Attachments Langriser I and II.
